PROJECTS

Lovely Professional University

Nov 2016- Mar 2018

- **Book Management System:** Developed a book program in C Language, after 4 months of C-programming course one week of duration in project completion. Program was used to store information about book present in a library, records of Book including price, number of units.
- **Soil pollution and its Management:** Research about various causes of wastage and took thorough survey in Lovely Professional University and Interviewed shop and mess owners. Ten days of duration of a project completion.
- **Smart home:** The main objective of this project is to reduce the time by creating distinct applications in smart phone in order to provide security so that only authenticate users can access to that particular area. For instance, when the user wants to enter into house he/she have to enter the password on the lock screen. In case, if the electrical appliances such as lights, fans are switched on then by using smart phone application the user can off the appliances by sitting at distant place.
